Technical Data Sheet

KP1616MFREIOPLAST-Peel-off Coating

Product description

Product technology Solvent-based air-drying coating

Property electrically conductive effect

Drying quickly

Full drying fast complete drying

Mechanical resistance good flexibility

Substrate Plastic, not defined in more detail, Non-ferrous metals, Steel, mineral

General product properties

Binder-Base Polyvinylbutyral

Colour in accordance with RAL 840 HR

other colours on request

Gloss visually matt

ViscosityFlow time 80-120 sec., 4 mm flow cupDIN 53211Density1,01-1,11 g/mltheoreticalSolid mass39-43 %theoreticalSolid content in volume23-33 %theoretical

Reference product The specified values refer to the product KP1616MRU743.

Resistance to storage approx. 12 month in original packagings at an ambient temperature of 18 to 25 °C. Protect

from frost. Open packages are to be used within a short time.

The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that they are still suitable for the intended application.

Application and processing

Pretreatment The substrate must be free of adhesion-impairing substances such as oil, grease, rust,

scale, mill scale, wax and release agent residues.

Note before use Prior to use, stir well or mix components homogeneously (e.g. with fast mixer).

Thinning EFD dilution 400906 (schnell)

EFD dilution 400500 (langsam)

Processing conditions from 10 °C to

25 °C

Rolling/painting as delivered viscosity

Material usage without application loss 180-190 g/m² theoretical

layer thickness 50 µm

Our technical data sheets are to provide you with advice based on our latest state of knowledge. This guidance does not release you from your own obligation to test our products for their suitability for your intended purposes and applications.

The sale of our products is in accordance with our terms of business, delivery and payment.

Technical Data Sheet

KP1616M FREIOPLAST-Peel-off Coating

Oven drying up to 100 °C possible (object temperature)

Air drying 20 °C, 50 % relative humidity

Dust drying after 10 minutes (degree of dryness 1) **DIN EN ISO 9117-5**

Dry to the touch after 2 hours (degree of dryness 4) **DIN EN ISO 9117-5**

Full drying after 18 hours (pendulum damping) **DIN EN ISO 1522**

Cleaning of equipment EFD dilution 400500

Comments

EFD info Further technical information can be found in the EFD Info. No. 170.

Work-and The standard personal safety precautions must be observed when handling painting Healthprotection materials. Detailed information about dangerous goods, safety data and

recommendations concerning Health and Safety at Work and environmental protection

can be found in the corresponding safety data sheet.

Test conditions All information is based on a standard climate 23/50 DIN EN 23270. All information is based on our product knowledge an experience. We have no direct influence on the

application itself. Please do not hesitate to contact us for further information.

The information provided here contains reference values and does not constitute a

specification.
