### Technical Data Sheet

# **KP1034H** FREIOPLAST-Clearcoat

#### **Product description**

**Product technology** solvent-based one-coat lacquer

**Drying** quickly

**Full drying** fast complete drying **Substrate** iron-phosphated steel

### **General product properties**

Binder-Base Combination of Polymerizate resin/co-resin

Colour transparent

Gloss value 55-65 GU, Angle 60° **DIN EN ISO 2813** satin glossy

Viscosity Flow time 60-90 sec., 4 mm flow cup **DIN 53211 Density** 0,9-1,0 g/ml theoretical Solid mass 36,5-37,5 % theoretical Solid content in volume 32,33 % theoretical

Reference product The specified values refer to the product KP1034HRA999.

approx. 24 month in original packagings at an ambient temperature of 5 to 25 °C. Open Resistance to storage

packages are to be used within a short time.

The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that

they are still suitable for the intended application.

#### Application and processing

The substrate must be free of adhesion-impairing substances such as oil, grease, rust, **Pretreatment** scale, mill scale, wax and release agent residues. We recommend the use of suitable mechanical pre-treatment processes (e.g. blasting, grinding) or chemical pre-treatment processes (e.g. phosphating) according to the requirements.

**Structure** Substrate On iron-phosphated steel plate

recommendation

Clearcoat

KP1034HRA999

Dry film thickness 25-40 µm

Note before use Prior to use, stir well or mix components homogeneously (e.g. with fast mixer).

Print date: Sep 3, 2024

from 10 °C to 25 °C **Processing conditions** 

painting as delivered viscosity

Material usage without application loss 80-90 g/m<sup>2</sup> theoretical

layer thickness 30 µm

## **Technical** Data Sheet

## **KP1034H** FREIOPLAST-Clearcoat

Oven drying up to 70 °C possible (object temperature)

Short-term load up to 200 °C possible

Air drying 20 °C, 50 % relative humidity

**Dust drying** after 8 minutes (degree of dryness 1) **DIN FN ISO 9117-5** 

Dry to the touch after 16 minutes (degree of dryness 4) **DIN EN ISO 9117-5 Full drying** after 2 hours (pendulum damping) **DIN EN ISO 1522** 

Cleaning of equipment EFD dilution 400474

#### Further processing of coated pieces

Repainting possible after grinding

#### Comments

**EFD** info Further technical information can be found in the EFD Info. No. 170.

Liability test Recommended performing adhesion tests if substrates painted differ from those

mentioned in the product description.

Work-and The standard personal safety precautions must be observed when handling painting Healthprotection

materials. Detailed information about dangerous goods, safety data and

recommendations concerning Health and Safety at Work and environmental protection

can be found in the corresponding safety data sheet.

**Test conditions** All information is based on a standard climate 23/50 DIN EN 23270. All information is

based on our product knowledge an experience. We have no direct influence on the application itself. Please do not hesitate to contact us for further information.

The information provided here contains reference values and does not constitute a

specification.
