Technical Data Sheet

300106

FREIOTHERM-ETL-Conservat. 106

Product description

Product technology Biocide for electrocoat paints

General product properties

pH-Value **DIN 19260** ca. 3,0

Density 0,9 - 1,2 g/cm³ theoretical

Resistance to storage approx. 17 month in original packagings at an ambient temperature of 5 to 25 °C. Protect from frost. Open packages are to be used within a short time.

> The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that they are still suitable for the intended application.

Application and processing

Note before use Direct addition to the basin is not possible! For a good mix, add to the overflow/weir or

mixing tube! The prodedure is dependant upon various factors and is therefore matched

to the application technology to the individual plant.

Additional quantity 0,1 - 0,3 %

Exposure mind. 48 hour

Comments

Work-and The standard personal safety precautions must be observed when handling painting Healthprotection

materials. Detailed information about dangerous goods, safety data and

recommendations concerning Health and Safety at Work and environmental protection

can be found in the corresponding safety data sheet.

Test conditions All information is based on a standard climate 23/50 DIN EN 23270. All information is

Print date: Jul 5, 2023

based on our product knowledge an experience. We have no direct influence on the application itself. Please do not hesitate to contact us for further information.
