Technical Data Sheet

PP5131A FREIOTHERM-Powder Coating

Product description

Product technology	Powder coating for decorative use on exteriors					
Application area	e.g. in the functional furniture and storage technology sector					
Surface	coarse structure					
Gloss value	mat					
Surface hardness	good					
Mechanical resistance	good					
Resistance to light and weather	good					

General product properties

Binder-Base	polyester resin				
Colour	Pure bright colour shades ans white-dependent tones cannot be created.				
Gloss visually	matt				
Density	1,2-1,7 g/cm ³ depending on the shade theoretical				
Resistance to storage	approx. 24 month in original packagings at an ambient temperature of 5 to 25 °C. Powder coatings must be stored in a cool and dry place.				
	The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that they are still suitable for the intended application.				

Application and processing

Pretreatment	The substrate must be free of adhesion-impairing substances such as oil, grease, rust, scale, mill scale, wax and release agent residues. We recommend the use of suitable mechanical pre-treatment processes (e.g. blasting, grinding) or chemical pre-treatment processes (e.g. phosphating) according to the requirements.				
Recommended coating thickness	Uniform surface structure across a range of 80 to 120 μm				
Material usage	approx. 0,1 kg/m², layer thickness 80 µm	theoretical			
Processing	Corona, Tribo				

Our technical data sheets are to provide you with advice based on our latest state of knowledge. This guidance does not release you from your own obligation to test our products for their suitability for your intended purposes and applications.

The sale of our products is in accordance with our terms of business, delivery and payment.

Technical Data Sheet

PP5131A FREIOTHERM-Powder Coating

Climatic tests							
Sample description	On zinc-phosphated steel plate product PP5131ARA916						
Condensate constant climate	Load duration Detachment Cut	504 h <1 mm	DIN EN ISO 6270-2 (CH) DIN EN ISO 4628-8				
Neutral salt spray test	Load duration Detachment Cut	504 h <1 mm	DIN EN ISO 9227 (NSS) DIN EN ISO 4628-8				
Chemical resistance							
Influencing factors	The chemical resistance depends on the concentration, temperature, exposure time and test method. This has to be checked depending on the application.						
Comments	Comments						
Work-and Healthprotection	The standard personal safety precautions must be observed when handling painting materials. Detailed information about dangerous goods, safety data and recommendations concerning Health and Safety at Work and environmental protection can be found in the corresponding safety data sheet.						
Test conditions	All information is based on a standard climate 23/50 DIN EN 23270. All information is based on our product knowledge an experience. We have no direct influence on the application itself. Please do not hesitate to contact us for further information.
