## Technical Data Sheet

#### **Product description**

Product technology	solvent-based 2-component coating
Abrasion resistance	good
Chemical resistance	very good
Substrate	Steel, Aluminium

#### **General product properties**

Binder-Base	Epoxy resin		
Colour	in accordance with RAL 840 HR other colours on request		
Gloss visually	glossy		
Viscosity	Flow time 80-100 sec., 4 mm flow cup	DIN 53211	
Density	1,05-1,15 g/ml after addition of hardener	theoretical	
Solid mass	53-59 % after addition of hardener	theoretical	
Solid content in volume	45-47 % after addition of hardener	theoretical	
Reference product	The specified values refer to the product ER1904GRA701.		
Resistance to storage	approx. 24 month in original packagings at an ambient temperature of 5 to 25 °C. Open packages are to be used within a short time.		
	The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that they are still suitable for the intended application.		

#### Application and processing

Pretreatment	The substrate must be free of adhesion-impairing substances such as oil, grease, rust,
	scale, mill scale, wax and release agent residues. We recommend the use of suitable
	mechanical pre-treatment processes (e.g. blasting, grinding) or chemical pre-treatment
	processes (e.g. phosphating) according to the requirements.

Our technical data sheets are to provide you with advice based on our latest state of knowledge. This guidance does not release you from your own obligation to test our products for their suitability for your intended purposes and applications.

The sale of our products is in accordance with our terms of business, delivery and payment.

DIN EN ISO 9001 | IATF 16949 | EMAS

### Technical Data Sheet

Structure recommendation	Substrate	Steel	
	Primer	ER1912M Mixing ratio 5:1 HE0052 Dry film thickness 70-90 μm	
	Top coat	ER1904G Mixing ratio 4:1 HE0020 Dry film thickness 40-60 μm	
Note before use	Prior to use, stir well or mix components homogeneously (e.g. with fast mixer).		
Hardener	HE0020		
Mixin ratio	Parts by weight 4:1		
Thinning	EFD dilution 400424		
Processing conditions	from 10 °C to 25 °C		
Processing time	max. 12 hrs. / 20 °C The processing time can dec	crease at higher temperatures a	and/or under pressure.
Airless spraying	as delivered viscosity after curing agent addition Nozzle 0,38 mm Angle 30° Material pressure 150 bar		
High pressure spraying	Set to 25-35 sec / 4 mm flow Nozzle 1,4 mm Spray pressure 3-4 bar	-cup after adding hardener	DIN 53211
Rolling/painting	as delivered viscosity after c	uring agent addition	
Material usage	without application loss 115- layer thickness 50 µm after a		theoretical
Oven drying	up to 70 °C possible (object temperature)		
Air drying	20 °C, 50 % relative humidity		
Dust drying	after 90 minutes (degree of o	dryness 1)	DIN EN ISO 9117-5
Dry to the touch	after 24 hours (degree of dry	ness 4)	DIN EN ISO 9117-5
Full drying	after 7 day/s (pendulum dam	iping)	DIN EN ISO 1522
Cleaning of equipment	with EFD dilution 400424 wit	hin the processing time.

# Technical Data Sheet

·	•
Repainting	possible after grinding. Clean the grinded surface removing adhesion-impairing materials afterwards.
Comments	
EFD info	Further technical information can be found in the EFD Info. No. 170.
Work-and Healthprotection	The standard personal safety precautions must be observed when handling painting materials. Detailed information about dangerous goods, safety data and recommendations concerning Health and Safety at Work and environmental protection can be found in the corresponding safety data sheet.
Test conditions	All information is based on a standard climate 23/50 DIN EN 23270. All information is based on our product knowledge an experience. We have no direct influence on the application itself. Please do not hesitate to contact us for further information. The information provided here contains reference values and does not constitute a specification.

#### Further processing of coated pieces
