

FREIOTHERM-Powder Coating

PI1012A

| | | | | | | | | | | | | | |
|--|--|--|---|---|---|---|--|------------------------|--------------------------|--|--|------------------|---|
| Characteristics | <ul style="list-style-type: none"> ■ Powder coating for restricted use on industrial exteriors ■ Application, e.g. in the mechanical engineering and plant construction sector ■ satin mat, micro structure ■ Good mechanical resistance and surface hardness ■ Uniform surface structure across a range of 70 to 110 µm | | | | | | | | | | | | |
| System Coating | <ul style="list-style-type: none"> ■ System Liquid Coating <p>For various applications, there are coatings available, whose optical appearance regarding colour, gloss degree and surface is in optimum balance.</p> | | | | | | | | | | | | |

| Processing and application Dependent on plant and buildings | <ul style="list-style-type: none"> ■ Processing / Loading Corona, Tribo ■ Pretreatment The substrate must be free of adhesion-impairing substances such as oil, grease, rust, scale, rolling skin, wax and separating agent residue. If requirements are more demanding than this, we recommend appropriate levels of phosphatizing or chromatizing. ■ Touch-up coating: on enquiry ■ Health & Safety at Work guidelines The standard personal safety precautions must be observed when handling painting | | | | | | | | | | | | |

Our technical data sheets are to provide you with advice based on our latest state of knowledge. This guidance does not release you from your own obligation to test our products for their suitability for your intended purposes and applications. The sale of our products is in accordance with our terms of business and delivery.

FREIOTHERM-Powder Coating PI1012A

Curing

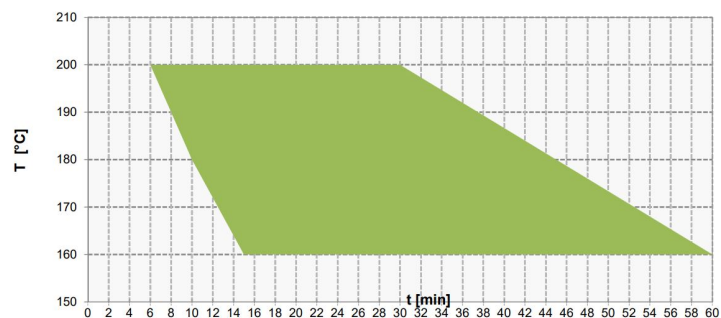

materials. Detailed information about dangerous goods, safety data and recommendations concerning Health & Safety at Work and environmental protection can be found in the corresponding safety data sheet.

■ **Object temperature**

Recommended baking temperature 10 min./180 °C

Baking window tested in colour shade RAL 9010
green cross-hatching = baking conditions with good final properties

| | | | | | |
|---|-----|-----|-----|--|--|
| Objekt Temperatur °C Object Temperature °C | 160 | 180 | 200 | | |
| Haltezeit Minimum Minuten Holding time minimum Minutes | 15 | 10 | 6 | | |
| Haltezeit Maximum Minuten Holding time maximum Minutes | 60 | 45 | 30 | | |

Resistance to storage

- Approx. 36 month in original packagings at an ambient temperature of 5 to 25 °C. Powder coatings must be stored in a cool and dry place.

The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that they are still suitable for the intended application.

Specific comments

- **Protective screening:** 160 µm
- **Compatibility with other powder coatings:** Needs to be checked
- **Test conditions**
All information is based on a standard climate 23/50 DIN EN 23270.
All information is based on our product knowledge an experience. We have no direct influence on the application itself. Please do not hesitate to contact us for further information.
