### Technical Data Sheet

# **PP3053A** FREIOTHERM-Powder Coating

#### **Product description**

Product technology	Powder coating for decorative use on exteriors					
Application area	e.g. in the construction and sanitary sector					
Surface	smooth					
Gloss value	satin glossy					
Application	for highest standards of resistance to abrasive wear					
Resistance to light and weather	very good					
Corrosion protection	very good					

#### **General product properties**

Binder-Base	polyester resin				
Colour	All common colour shades				
Gloss value	satin glossy	glossy 55-75 GU, Angle 60°			
Density	1,2-1,7 g/cm <sup>3</sup> depending on	theoretical			
Resistance to storage	approx. 24 month in original packagings at an ambient temperature of 5 to 25 °C. Powder coatings must be stored in a cool and dry place.				
	The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that they are still suitable for the intended application.				

#### Application and processing

Pretreatment	The substrate must be free of adhesion-impairing substances such as oil, grease, rust, scale, mill scale, wax and release agent residues. We recommend the use of suitable mechanical pre-treatment processes (e.g. blasting, grinding) or chemical pre-treatment processes (e.g. phosphating) according to the requirements.					
Recommended coating thickness	70-90 μm					
Material usage	approx. 0,11 kg/m², layer thickness 80 µm	theoretical				
Processing	Corona, Tribo					

Our technical data sheets are to provide you with advice based on our latest state of knowledge. This guidance does not release you from your own obligation to test our products for their suitability for your intended purposes and applications.

The sale of our products is in accordance with our terms of business, delivery and payment.
