### Technical Data Sheet

## **PS3005B** FREIOTHERM-Powder Coating

#### **Product description**

Product technology	Super durable powder coating for decorative use on exteriors		
Application area	e.g. in the vehicle construction sector		
Surface	smooth		
Gloss value	high glossy		
Surface hardness	good		
Mechanical resistance	good		

### **General product properties**

Binder-Base	polyester resin		
Colour	All common colour shades		
Gloss value	high glossy	>70 GU, Angle 20°	DIN EN ISO 2813
Density	1,2-1,7 g/cm <sup>3</sup> depending on the shade		theoretical
Resistance to storage	approx. 24 month in original packagings at an ambient temperature of 5 to 25 °C. Powder coatings must be stored in a cool and dry place.		
	The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that they are still suitable for the intended application.		

#### Application and processing

Pretreatment	The substrate must be free of adhesion-impairing substances such as oil, grease, rust, scale, mill scale, wax and release agent residues. We recommend the use of suitable mechanical pre-treatment processes (e.g. blasting, grinding) or chemical pre-treatment processes (e.g. phosphating) according to the requirements.	
Recommended coating thickness	80-100 μm	
Material usage	approx. 0,13 kg/m², layer thickness 90 µm	theoretical
Processing	Corona	

Our technical data sheets are to provide you with advice based on our latest state of knowledge. This guidance does not release you from your own obligation to test our products for their suitability for your intended purposes and applications.

The sale of our products is in accordance with our terms of business, delivery and payment.
