Technical Data Sheet

UR1055G_HU0061 **EFDEDUR-Coating**

Product description

Product technology solvent-based 2-component coating

Application area e.g. in the mechanical engineering and plant construction sector

Application For interior and exterior applications

Resistance to light and

weather

very good

Substrate PMMA (polymethyl methacrylate), PVC (polyvinyl chloride), Non-ferrous metals, Steel

General product properties

Binder-Base Acrylic Resin

Colour in accordance with RAL 840 HR

other colours on request

Gloss value 70-85 GU, angle 20° DIN EN ISO 2813 high glossy

Viscosity Flow time 45-55 sec., 4 mm flow cup DIN 53211 Density 1,10-1,2 g/ml after addition of hardener theoretical Solid mass 54,0-60,0 % after addition of hardener theoretical 41,0-46,0 % after addition of hardener Solid content in volume theoretical

The specified values refer to the product UR1055GRA903. Reference product

Resistance to storage approx. 24 month in original packagings at an ambient temperature of 5 to 25 °C. Open

packages are to be used within a short time.

The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that they are still suitable for the intended application.

Application and processing

Pretreatment The substrate must be free of adhesion-impairing substances such as oil, grease, rust, scale, mill scale, wax and release agent residues. We recommend the use of suitable

mechanical pre-treatment processes (e.g. blasting, grinding) or chemical pre-treatment

processes (e.g. phosphating) according to the requirements.

Structure recommendation Substrate Steel

Primer ER1912M

> Mixing ratio 5:1 HE0052 Dry film thickness 70 µm

Top coat UR1055G

> Mixing ratio 5:1 HU0061 Dry film thickness 50 µm

Technical Data Sheet

Processing time

UR1055G_HU0061 **EFDEDUR-Coating**

Note before use Prior to use, stir well or mix components homogeneously (e.g. with fast mixer).

Hardener HU0061

Mixin ratio Parts by weight 5:1

Volume parts 3,8:1

Thinning EFD dilution 400320 from 10 °C to 25 °C **Processing conditions**

The processing time can decrease at higher temperatures and/or under pressure.

Airless spraying as delivered viscosity after curing agent addition

max. 6 hrs. / 20 °C

Nozzle 0,33 mm Angle 40° Material pressure 150 bar

Set to 20-25 sec / 4 mm flow-cup after adding hardener High pressure spraying

DIN 53211

Nozzle 1,8 mm Spray pressure 3-4 bar

Rolling/painting rolling/painting as delivered viscosity after curing agent addition

> Add 0,5 to 1,0% by wight EFD-Relaxation agent 300807 for roller and brush application in case of bubble formation.

Material usage without application loss 125-140 g/m² theoretical

layer thickness 50 µm after addition of hardener

Oven drying up to 100 °C possible (object temperature)

Air drying 20 °C, 50 % relative humidity

Dust drying after 30 minutes (degree of dryness 1) **DIN EN ISO 9117-5** Dry to the touch after 4 hours (degree of dryness 4) **DIN EN ISO 9117-5 Full drying** after 10 day/s (pendulum damping) **DIN EN ISO 1522**

Cleaning of equipment EFD dilution 400500

Comments

EFD info Further technical information can be found in the EFD Info. No. 170.

Work-and The standard personal safety precautions must be observed when handling painting Healthprotection materials. Detailed information about dangerous goods, safety data and

recommendations concerning Health and Safety at Work and environmental protection

can be found in the corresponding safety data sheet.

Test conditions All information is based on a standard climate 23/50 DIN EN 23270. All information is

based on our product knowledge an experience. We have no direct influence on the application itself. Please do not hesitate to contact us for further information.

The information provided here contains reference values and does not constitute a specification.

Our technical data sheets are to provide you with advice based on our latest state of knowledge This guidance does not release you from your own obligation to test our products for their suitability for your intended purposes and applications
