

400001

FREIOTHERM-ETL-Titrationslösung

Product description

Product technology Solvents for electrocoat paints

General product properties

Density 0,8-1,1 g/ml theoretical

Resistance to storage approx. 60 month in original packagings at an ambient temperature of 5 to 25 °C. Protect from frost. Open packages are to be used within a short time.

The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that they are still suitable for the intended application.

Application and processing

Note before use Titration solution to be used for MEQ determination only! Don't add to the paint tank.

Comments
