Technical Data Sheet

UR9140H_HU0001EFDEDUR-System-Coating

Product description

Product technology solvent-based 2-component coating

Application area e.g. in the mechanical engineering and plant construction sector

Application For interior and exterior applications

Resistance to light and

weather

good

System coating structure possible (see information)

Substrate PC (polycarbonate), PMMA (polymethyl methacrylate), PVC (polyvinyl chloride), PA 6

(polyamide 6), GRP (glassfibre reinforced plastic), ABS (acrylonitrile butadiene styrene),

Non-ferrous metals, Steel

General product properties

Binder-Base Acrylic Resin

Colour according to FreiLacke reference sample

Gloss value According to the powder reference sample

ViscosityFlow time 90-120 sec., 4 mm flow cupDIN 53211Density1,00-1,40 g/ml after addition of hardenertheoretical

Solid mass46-66 % after addition of hardenertheoreticalSolid content in volume38-49 % after addition of hardenertheoretical

Reference product The specified values refer to the product UR9140HG1888.

Resistance to storage approx. 24 month in original packagings at an ambient temperature of 5 to 25 °C. Open

Print date: Sep 6, 2024

packages are to be used within a short time.

The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that they are still suitable for the intended application.

Application and processing

Pretreatment

The substrate must be free of adhesion-impairing substances such as oil, grease, rust, scale, mill scale, wax and release agent residues. We recommend the use of suitable mechanical pre-treatment processes (e.g. blasting, grinding) or chemical pre-treatment processes (e.g. phosphating) according to the requirements.

Our technical data sheets are to provide you with advice based on our latest state of knowledge. This guidance does not release you from your own obligation to test our products for their suitability for your intended purposes and applications.

The sale of our products is in accordance with our terms of business, delivery and payment.

Structure

recommendation

Substrate

Steel

Primer

ER1912M

Mixing ratio 5:1 HE0052

Dry film thickness 70-90 μm

Top coat

UR9140H

Mixing ratio 5:1 HU0001 Dry film thickness 40-60 µm

Note before use Prior to use, stir well or mix components homogeneously (e.g. with fast mixer).

Hardener HU0001

Mixin ratio Parts by weight 5:1

Thinning EFD dilution 400320

EFD dilution 400500 EFD dilution 400018

Processing conditions from 10 °C to 25 °C

Processing time max. 6 hrs. / 20 °C

The processing time can decrease at higher temperatures and/or under pressure.

High pressure spraying

Set to 18-22 sec / 4 mm flow-cup after adding hardener

DIN 53211

theoretical

Nozzle 1,4 mm

Spray pressure 3-4 bar

Rolling/painting rolling/painting

as delivered viscosity after curing agent addition Add 0,5 to 1,0% by wight EFD-Relaxation agent 300807 for

roller and brush application in case of bubble formation.

Material usage without application loss 100-140 g/m²

layer thickness 50 µm after addition of hardener

Oven drying up to 100 °C possible (object temperature)

Air drying 20 °C, 50 % relative humidity

Dust drying after 30 minutes (degree of dryness 1)

after 7 hours (degree of dryness 4) DIN EN ISO 9117-5

Full drying after 14 day/s (pendulum damping)

DIN EN ISO 1522

DIN EN ISO 9117-5

Cleaning of equipment EFD dilution 400500

Comments

Dry to the touch

EFD info

Further technical information can be found in the EFD Info. No. 170.

System Coating

Can be integrated into the system coating concept as a horizontal system coating (different coatings with the same look) or vertical system coating (part of a multi-layer structure). For more information, see www.freilacke.de/systemlacke.

Technical Data Sheet

UR9140H_HU0001 **EFDEDUR-System-Coating**

Work-and Healthprotection

The standard personal safety precautions must be observed when handling painting materials. Detailed information about dangerous goods, safety data and recommendations concerning Health and Safety at Work and environmental protection can be found in the corresponding safety data sheet.

Test conditions

All information is based on a standard climate 23/50 DIN EN 23270. All information is based on our product knowledge an experience. We have no direct influence on the application itself. Please do not hesitate to contact us for further information.

The information provided here contains reference values and does not constitute a specification.
