## **Technical** Data Sheet

theoretical

# **BD7291X**DURELASTIC-PU-Top Coat

### **Product description**

Product technology Solvent-free 2C-PU coating

Resistance to light and

weather

very good

**Chemical resistance** 

Good, against weak acids and bases.
Conditionally good, against organic solvents.

Substrate CFRP (carbon fiber-reinforced plastic), mineral

### **General product properties**

Colour in accordance with RAL 840 HR

other colours on request

Viscosity 1000 - 3000 mPa\*s

Density 1,2 +/- 0,1 g/ml

Solid mass ca. 100 % after addition of hardener

Solid mass ca. 100 % after addition of hardener theoretical

**Resistance to storage**At least 12 months in original packaging in case the original packaging stored tightly closed at 5 to 25 °C.

Opened packagings must be processed quickly.

The best-before date of the respective batch is indicated on the product label. Storage beyond the specified period does not necessarily mean that the product is unusable. However, it is essential to check the properties required for the respective application in this case for quality assurance reasons.

## Application and processing

Pretreatment The substrate must be free of adhesion-impairing substances such as oil, grease, rust,

scale, mill scale, wax and release agent residues. An adhesive primer may be required.

Note before use Prior to use, stir well or mix components homogeneously (e.g. with fast mixer).

In order to prevent mixing errors, repotting the mixed material is recommended.

Contact with water and solvents must be avoided before and during the mixing process. Even small quantities will accelerate the curing process. (= reducing the processing time)

Hardener HD0233

Mixin ratio Parts by weight 100 : 54

Thinning EFD dilution 400450

Processing conditions from > 15 °C to 40 °C

Processing time Max. 25 - 45 min. / 20 °C

The processing time can decrease at higher temperatures/humidities and/or under

pressure.

Airless spraying Following the addition of the curing agent and approx. 10-30 % dilution

Our technical data sheets are to provide you with advice based on our latest state of knowledge. This guidance does not release you from your own obligation to test our products for their suitability for your intended purposes and applications.

The sale of our products is in accordance with our terms of business, delivery and payment.

## **Technical** Data Sheet

# **BD7291X**DURELASTIC-PU-Top Coat

painting as delivered viscosity

Material usage 250 - 1000 g/m² mean test layer thickness theoretical

Dust drying after 30 minutes (degree of dryness 1) DIN EN ISO 9117-5

Cleaning of equipment Immediately with organic solvents, hardened residues can only be removed mechanically.

#### **Comments**

Work-and Healthprotection

The standard personal safety precautions must be observed when handling painting materials. Detailed information about dangerous goods, safety data and recommendations concerning Health and Safety at Work and environmental protection can be found in the corresponding safety data sheet.

**Test conditions** 

All information is based on a standard climate 23/50 DIN EN 23270. All information is based on our product knowledge an experience. We have no direct influence on the application itself. Please do not hesitate to contact us for further information.
