Technical Data Sheet

PR2012A FREIOTHERM-Powder Coating

Product description

Product technology	Powder coating for decorative use on exteriors		
Application area	e.g. in the job coater sector		
Surface	micro structure		
Gloss value	satin mat		
Mechanical resistance	very good		
Resistance to light and weather	good		

General product properties

Binder-Base	polyester resin		
Colour	All common colour shades		
Gloss visually	satin mat		
Density	1,2-1,7 g/cm ³ depending on the shade theoretical		
Resistance to storage	approx. 36 month in original packagings at an ambient temperature of 5 to 25 °C. Powder coatings must be stored in a cool and dry place.		
	The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that they are still suitable for the intended application.		

Application and processing

Pretreatment	The substrate must be free of adhesion-impairing substances such as oil, grease, rust, scale, mill scale, wax and release agent residues. We recommend the use of suitable mechanical pre-treatment processes (e.g. blasting, grinding) or chemical pre-treatment processes (e.g. phosphating) according to the requirements.	
Recommended coating thickness	Uniform surface structure across a range of 70 to 110 μm	
Material usage	approx. 0,12 kg/m², layer thickness 80 µm	theoretical
Processing	Corona, Tribo	

Our technical data sheets are to provide you with advice based on our latest state of knowledge. This guidance does not release you from your own obligation to test our products for their suitability for your intended purposes and applications.

The sale of our products is in accordance with our terms of business, delivery and payment.

PR2012A FREIOTHERM-Powder Coating

Curing	Recommended object temperature 10 min/160 °C. Baking window tested in colour shade RAL 9005.				
	190				
	180				
	160				
	150 0 5 10 15 20 25 30 35 40 45 50 t [min]				
	Objekt Temperatur in °C Object Temperature in °C 160				
	Haltezeit Minimum in Minuten Holding time minimum in minutes 10 5				
	Haltezeit Maximum in Minuten Holding time maximum in minutes 45 30				
Note on curing	Coloured area = stoving conditions with good end properties				
	The displayed baking conditions are based on results from laboratory tests and therefore merely serve as a guideline when configuring the processing company's coating system The processing company is responsible for ensuring that the coating is fully cured. The complete curing of the coating must be checked by means of additional analytical and resistance tests using representative original parts under production conditions. Please of not hesitate to contact us if you require consultation.				
Compatibility	Compatibility with other powder coatings must be checked.				
Further processing	of coated pieces				
Touch-up coating	on request. For details see EFD Info No. 4				
Mechanical tests					
Sample description	On steel plate 60-80 μm layer thickness 10 minutes 160°C object temperature product PR2012ARA905				
Cross-cut-test	Gt 0 DIN EN ISO 2409				
Cupping test	>3 mm DIN EN ISO 1520				

This guidance does not release you from your own obligation to test our products for their suitability for your intended purposes and applications.

The sale of our products is in accordance with our terms of business, delivery and payment.

PR2012A FREIOTHERM-Powder Coating

Climatic tests					
Sample description	On zinc-phosphated steel plate product PR2012ARA905				
Condensate constant climate	Load duration Detachment Cut	1000 h <1 mm	DIN EN ISO 6270-2 (CH) DIN EN ISO 4628-8		
Neutral salt spray test	Load duration Detachment Cut	1000 h <1 mm	DIN EN ISO 9227 (NSS) DIN EN ISO 4628-8		
Chemical resistance					
Influencing factors	The chemical resistance depends on the concentration, temperature, exposure time and test method. This has to be checked depending on the application.				
Comments					
Work-and Healthprotection	The standard personal safety precautions must be observed when handling painting materials. Detailed information about dangerous goods, safety data and recommendations concerning Health and Safety at Work and environmental protection can be found in the corresponding safety data sheet.				
Test conditions	All information is based on a standard climate 23/50 DIN EN 23270. All information is based on our product knowledge an experience. We have no direct influence on the application itself. Please do not hesitate to contact us for further information.
