Technical Data Sheet

WL1525L FREIOPLAST-Hydro-Edge protection

Product description			
-			
Product technology	water-thinnable single-layer coating		
Application area	e.g. in the construction and sanitary sector		
Substrate	Wood		
General product prop	perties		
Binder-Base	Acrylate-styrene copolymer		
Colour	All common colour shades		
Gloss visually	matt		
Viscosity	500-1000 mPa*s, spindle 4, 60 revolutions/min.	DIN EN ISO 2555	
pH-Value	8,4-9,1	DIN 19260	
Solid mass	18-20 %	theoretical	
Solid content in volume	13-15 %	theoretical	
Reference product	The values given refer to the product with the shade WL1525LH3059.		
Resistance to storage	approx. 12 month in original packagings at an ambient temperature of 5 to 25 °C. Protect from frost. Open packages are to be used within a short time.		
	The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that they are still suitable for the intended application.		
Application and proc	essing		
Pretreatment	The substrate must be free of adhesion-impairing substances such as oil, grease, rust, scale, mill scale, wax and release agent residues. We recommend the use of suitable mechanical pre-treatment processes (e.g. blasting, grinding) or chemical pre-treatment processes (e.g. phosphating) according to the requirements.		
Structure recommendation	Substrate Wood		

Note before use Prior to use, stir well or mix components homogeneously (e.g. with fast mixer). To prevent skin formation, over-coat with water.

WL1525LH3059

Dry film thickness 60-80 µm

Thinning	demineralised water
Object temperature	10-30 °C, minimum +3 °C above dew point temperature
Processing conditions	Room temperature 18-25 °C Relative humidity 40-60 %

Our technical data sheets are to provide you with advice based on our latest state of knowledge. This guidance does not release you from your own obligation to test our products for their suitability for your intended purposes and applications. The sale of our products is in accordance with our terms of business, delivery and payment

Technical Data Sheet

WL1525L FREIOPLAST-Hydro-Edge protection

Airless spraying	delivery viscosity Nozzle 11 mm Angle 40° Material pressure 140 bar	
High pressure spraying	40-50 sec. / 4 mm Flow cup Nozzle 1,4 mm Injection pressure 3,5 bar	DIN 53211
Material usage	without application loss 550-600 g/m² layer thickness 80 µm	theoretical
Oven drying	up to 70 °C possible	
Air drying	18-22 °C, 40-60 % relative humidity	
Dust drying	after 15 minutes (degree of dryness 1)	DIN EN ISO 9117-5
Dry to the touch	after 1 hours (degree of dryness 4)	DIN EN ISO 9117-5
Full drying	after 17 day/s (pendulum damping)	DIN EN ISO 1522
Cleaning of equipment	immediately with water - possibly with addition of 5-10 % by weight EFD cleaning agent 400916, dried-on equipment with org. solvents, e.g. EFD thinner 400424.	

Further processing of coated pieces

Repainting	possible with same quality, dry at the earliest after matting.	
Comments		
EFD info	Further technical information can be found in the EFD Info. No. 111.	
Work-and Healthprotection	The standard personal safety precautions must be observed when handling painting materials. Detailed information about dangerous goods, safety data and recommendations concerning Health and Safety at Work and environmental protection can be found in the corresponding safety data sheet.	
Test conditions	All information is based on a standard climate 23/50 DIN EN 23270. All information is based on our product knowledge an experience. We have no direct influence on the application itself. Please do not hesitate to contact us for further information. The information provided here contains reference values and does not constitute a specification.
