# Technical Data Sheet

## **BD7759XRU999** DURELASTIC-UP-Laminating Resin

### **Product description**

Application	Suitable for cold hardening and hot pressing				
General product properties					
Binder-Base	unsaturated polyester resin, styrene containing				
Colour	colorless				
Viscosity	ca. 1100 mPa*s				
Density	1,1 +/- 0,1 g/ml	theoretical			
Solid mass	63 - 67 %	theoretical			
Resistance to storage	approx. 6 month in original packagings at an ambient temperature of 5 to 25 °C. Open packages are to be used within a short time.				
	The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that they are still suitable for the intended application.				
	As the time in storage increases, the gelling and curing times can change. The original gelling time can be adjusted by adding accelerators (e.g. BD7550).				

#### Application and processing

	GRP types (of glass fibre-reinforced plastic)	
Tool/mould	Separating film	
	Metal molds	
Pretreatment	Treat moulds with suitable separating agents.	
Note before use	Prior to use, stir well or mix components homogeneously (e.g. with fast mixer).	
Hardener	2 % HD0625	
Mixin ratio	Resin : Accelerator : Hardener Parts by weight 100 : 0,2 - 0,5 : 2	
Thinning	EFD dilution 400900	
Processing conditions	During processing, a room, material and mould temperature of [Variable] °C must be guaranteed in order to prevent hardening problems and cracking.	
Processing time	max. 20 min. / 20 °C With the addition of 0,2 % BD7550	
Application	as delivered viscosity.	
Cleaning of equipment	with EFD cleaning agent 400906 within the processing time.
