### Technical Data Sheet

# **PU6003B** FREIOTHERM-Powder Coating

### **Product description**

Product technology	Super durable powder coating for decorative use on exteriors		
Application area	e.g. Rail vehicles and components		
Surface	smooth		
Gloss value	satin glossy		
Surface hardness	good		
Mechanical resistance	good		
Chemical resistance	good resistance to cleaning agents and graffiti removers		

### **General product properties**

Binder-Base	polyurethane (non-separating)		
Colour	All common colour shades		
Gloss value	satin glossy	65-75 GU, Angle 60°	DIN EN ISO 2813
Density	1,2-1,7 g/cm <sup>3</sup> depending on the shade th		theoretical
Resistance to storage	approx. 36 month in original packagings at an ambient temperature of 5 to 25 °C. Powder coatings must be stored in a cool and dry place.		
	The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that they are still suitable for the intended application.		

#### Application and processing

Pretreatment	The substrate must be free of adhesion-impairing substances such as oil, grease, rust, scale, mill scale, wax and release agent residues. We recommend the use of suitable mechanical pre-treatment processes (e.g. blasting, grinding) or chemical pre-treatment processes (e.g. phosphating) according to the requirements.		
Recommended coating thickness	60-80 μm		
Material usage	approx. 0,1 kg/m², layer thickness 70 µm	theoretical	
Processing	Corona		

Our technical data sheets are to provide you with advice based on our latest state of knowledge. This guidance does not release you from your own obligation to test our products for their suitability for your intended purposes and applications.

The sale of our products is in accordance with our terms of business, delivery and payment.

	180					
	170 0 5 10 15 20 25 30 35 40 45 50 t [min]					
	Objekt Temperatur in °C Object Temperature in °C <b>180 200 210</b>					
	Haltezeit Minimum in Minuten Holding time minimum in minutes <b>25 10 6</b>					
	Haltezeit Maximum in Minuten Holding time maximum in minutes <b>45 20 10</b>					
Note on curing	Coloured area = stoving conditions with good end properties					
	The displayed baking conditions are based on results from laboratory tests and therefore merely serve as a guideline when configuring the processing company's coating systems.					
	The processing company is responsible for ensuring that the coating is fully cured. The complete curing of the coating must be checked by means of additional analytical and resistance tests using representative original parts under production conditions. Please do					
	not hesitate to contact us if you require consultation.					
Compatibility	Compatibility with other powder coatings must be checked.					

### Further processing of coated pieces

**Touch-up coating** 

on request. For details see EFD Info No. 4..

### Technical Data Sheet

# **PU6003B** FREIOTHERM-Powder Coating

#### Mechanical tests

Sample description	On steel plate 60-80 µm layer thickness 10 minutes 200°C object temperature product PU6003BRG735				
Cross-cut-test	Gt 0		DIN EN ISO 2409		
Cupping test	>3 mm		DIN EN ISO 1520		
Impact-test	>40 kg cm (front)		DIN EN ISO 6272-1		
Climatic tests					
Sample description	On zinc-phosphated steel plate Primer: Suitable powder coating primer. product PU6003BRG735.				
Condensate constant	Load duration	1000 h	DIN EN ISO 6270-2 (CH)		
climate	Detachment Cut	<1 mm	DIN EN ISO 4628-8		
Neutral salt spray test	Load duration	1000 h	DIN EN ISO 9227 (NSS)		
	Detachment Cut	<3 mm	DIN EN ISO 4628-8		
Chemical resistance					
Influencing factors	The chemical resistance depends on the concentration, temperature, exposure time and test method. This has to be checked depending on the application.				
Comments					
Work-and Healthprotection	The standard personal safety precautions must be observed when handling painting materials. Detailed information about dangerous goods, safety data and recommendations concerning Health and Safety at Work and environmental protection can be found in the corresponding safety data sheet.				

Test conditionsAll information is based on a standard climate 23/50 DIN EN 23270. All information is<br/>based on our product knowledge an experience. We have no direct influence on the<br/>application itself. Please do not hesitate to contact us for further information.

The information provided here contains reference values and does not constitute a specification.
