## **Technical** Data Sheet

## **BD7460M**

# **DURELASTIC-Sanding-Gelcoat**

#### **Product description**

Product technology Styrene-based gel coat

**Application** Spraying possible

Stability very good
Grindability good

#### General product properties

Binder-Base unsaturated polyester resin, styrene containing

Colour in accordance with RAL 840 HR

other colours on request

Gloss visually matt

Viscosity 600 - 900 mPa\*s

Density 1,3 g/ml theoretical

**Resistance to storage** approx. 4 month in original packagings at an ambient temperature of 5 to 25 °C. Open

packages are to be used within a short time.

The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that they are still suitable for the intended application.

As the time in storage increases, the gelling and curing times can change. The original gelling time can be adjusted by adding accelerators (e.g. BD7550).

#### Application and processing

Separating film

Tool/mould Metal molds

GRP types (of glass fibre-reinforced plastic)

**Pretreatment** Treat moulds with suitable separating agents.

Note before use Prior to use, stir slowly and well without letting air in or mix components homogeneously.

**Mixin ratio** + 2 % Durelastic curing agent (MEKP 50) HD0625

Thinning EFD dilution 1 -3 % 400900

Processing conditions During processing, a room, material and mould temperature of [Variable] °C must be

guaranteed in order to prevent hardening problems and cracking.

Processing time Max. 9 - 12 min. / 20 °C

The processing time can decrease at higher temperatures/humidities and/or under

pressure.

## **Technical** Data Sheet

# **BD7460M DURELASTIC-Sanding-Gelcoat**

High pressure spraying

as delivered viscosity

nozzle 3 mm

spray pressure 2,5 - 3,5 bar

Material usage

500 - 600 g/m² mean test layer thickness

theoretical

Cleaning of equipment

with EFD cleaning agent 400906 within the processing time.

#### Further processing of coated pieces

Over-laminatable

after 90 min., at the latest after 12 hours at 20°C material and room temperature.

#### Comments

Work-and Healthprotection The standard personal safety precautions must be observed when handling painting materials. Detailed information about dangerous goods, safety data and recommendations concerning Health and Safety at Work and environmental protection

can be found in the corresponding safety data sheet.
