DURELASTIC-UP-Laminating Resin

Product description

Product technology Amine pre-accelerated

Property medium reactive

Substrate Wood, mineral

General product properties

Binder-Base unsaturated polyester resin, styrene containing

Colour colorless

ViscosityFlow time ca. 100 sec., 4 mm flow cupDIN 53211Density1,1 +/- 0,1 g/mltheoreticalSolid mass58 - 62 %theoretical

Resistance to storage approx. 6 month in original packagings at an ambient temperature of 5 to 25 °C. Open

packages are to be used within a short time.

The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that they are still suitable for the intended application.

Application and processing

Tool/mould GRP types (of glass fibre-reinforced plastic)

Metal molds

Pretreatment The substrate must be free of adhesion-impairing substances such as oil, grease, rust,

scale, mill scale, wax and release agent residues. The wood must be dry and capable of

bearing.

Note before use Prior to use, stir well or mix components homogeneously (e.g. with fast mixer).

Mixin ratio Parts by weight 2 - 5 % HD0610

Thinning EFD dilution 400900

Processing conditions During processing, a room, material and mould temperature of [Variable] °C must be

Print date: Feb 28, 2025

guaranteed in order to prevent hardening problems and cracking.

Processing time max. 30 min. / 20 °C

With the addition of 2 % HD0610

Application as delivered viscosity.

Cleaning of equipment with EFD cleaning agent 400906 within the processing time.
