

## **Technical Data Sheet**

## **DURELASTIC**

## Pigment Paste 350-DURPaste

- Binder based on unsaturated polyester resin, styrene-free
- High concentration
- High colouring power
- Good to very good light resistance

Technical / Physical data	Colour	acc. to RAL 840 HR, other colour shades on request
	Original viscosity	fluidly to pasty (pigment-dependently)
	Density	1,2 to 2,2 g / ml + / - 0,1 calculated
Storability	Approx. 11 month in original packings at an ambient temperature of 15 to 25 ℃, in case the original packings are tightly closed. Opened packing must be used very shortly.	
	The minimum storage stability of each batch is mentioned on the product label. A storage time beyond the mentioned date doesn't necessarily mean that the material is	
Processing and application	Application, Addition of	in original viscosity 2 to 5% for colouring of resins 10 to 15% for colouring of top coat resins
	Cleaning of working equipment EFD-Cleaning agent 400906	
	Advise for safety protection and protection of health The usual precautionery measures for ventilation as well as for personal protection are to be observed when handling painting materials. Detailled information about dangerous goods, sayfety data and recommendations concerning health protection and environment protection can be read in the corresponding safety data sheet.	
Special remarks	Preliminary tests accomplish. Dependent on the colour the pigments can the pot life shorten or extend	
	Test conditions All information is based on a standard climate 20/65 DIN 50014. The information about economy and characteristics dependent on colour.	
	The information in this data sheet are reference values and are not given as
