Technical Data Sheet

PP51510 FREIOTHERM-Powder Coating

Product description

Product technology	Powder coating for decorative use on exteriors	
Application area	e.g. in the functional furniture and storage technology sector	
Surface finish	Metallic effect	
Property	Conductive	
Production process	bonded	
Degassing	good	
Surface hardness	good	
Mechanical resistance	good	

General product properties

Binder-Base	polyester resin		
Gloss visually	matt		
Density	1,2-1,7 g/cm ³ depending on the shade theoretical		
Resistance to storage	approx. 36 month in original packagings at an ambient temperature of 5 to 25 °C. Powder coatings must be stored in a cool and dry place.		
	The minimum storage stability of each batch is stated on the product label. The mater does not necessarily become unusable if stored for longer than this period. However quality assurance purposes, an inspection of these materials is essential to ensure the they are still suitable for the intended application.		

Application and processing

Pretreatment	The substrate must be free of adhesion-impairing substances such as oil, grease, rust, scale, mill scale, wax and release agent residues. We recommend the use of suitable mechanical pre-treatment processes (e.g. blasting, grinding) or chemical pre-treatment processes (e.g. phosphating) according to the requirements.	
Recommended coating thickness	60-80 μm	
Material usage	approx. 0,11 kg/m², layer thickness 70 μm	theoretical
Processing	Corona	

Our technical data sheets are to provide you with advice based on our latest state of knowledge. This guidance does not release you from your own obligation to test our products for their suitability for your intended purposes and applications.

The sale of our products is in accordance with our terms of business, delivery and payment.

	Haltezeit Maximum in Minuten4515Holding time maximum in minutes				
Note on curing	Coloured area = stoving conditions with good end properties				
	The displayed baking conditions are based on results from laboratory tests and therefore				
	merely serve as a guideline when configuring the processing company's coating systems.				
	The processing company is responsible for ensuring that the coating is fully cured. The				
	complete curing of the coating must be checked by means of additional analytical and resistance tests using representative original parts under production conditions. Please do				
	not hesitate to contact us if you require consultation.				
Compatibility	Compatibility with other powder coatings must be checked.				

Further processing of coated pieces

Touch-up coating

on request. For details see EFD Info No. 4..

Technical Data Sheet

PP51510 FREIOTHERM-Powder Coating

Mechanical tests

Sample description	On steel plate 60-80 μm layer thickness 10 minutes 180°C object temperature product PP51510I1384			
Cross-cut-test	Gt 0		DIN EN ISO 2409	
Cupping test	>6 mm		DIN EN ISO 1520	
Impact-test	80 kg cm (front)		DIN EN ISO 6272-1	
Climatic tests				
Sample description	On zinc-phosphated steel plate product PP51510I1384			
Condensate constant	Load duration	504 h	DIN EN ISO 6270-2 (CH)	
climate	Detachment Cut	<1 mm	DIN EN ISO 4628-8	
Neutral salt spray test	Load duration	504 h	DIN EN ISO 9227 (NSS)	
	Detachment Cut	<1 mm	DIN EN ISO 4628-8	

Chemical resistance

Influencing factors	The chemical resistance depends on the concentration, temperature, exposure time and test method. This has to be checked depending on the application.
Comments	
EFD info	Further technical information can be found in the EFD Info. No. 502.
Work-and Healthprotection	The standard personal safety precautions must be observed when handling painting materials. Detailed information about dangerous goods, safety data and recommendations concerning Health and Safety at Work and environmental protection can be found in the corresponding safety data sheet.
Test conditions	All information is based on a standard climate 23/50 DIN EN 23270. All information is based on our product knowledge an experience. We have no direct influence on the application itself. Please do not hesitate to contact us for further information. The information provided here contains reference values and does not constitute a specification.
