

Technical Data Sheet

DURELASTIC

Smooth Filler BD7413MRU910

- Good hardening at 6 ℃ ≻
- ≻ Excellent adhesion
- Thixotropic adjustment
- Grindable after short time
- Supply as set, inclusive. Harder

Gloss value	mat
Original viscosity	pastily
Mixing ratio	2- 3 % Hardener-Paste BPO, transparent - in the Set
Potlife	2% hardener addition = 4 to 5 min.3% hardener addition = 3 to 4 min.
Density calculated	1,8 g / ml
Solid content after hardener addition, calculated	100 %
Material usage	100 to 1000 g / m ²
	Original viscosity Mixing ratio Potlife Density calculated Solid content after hardener addition, calculated

case the original packings are tightly closed. Opened packing must be used very shortly. The minimum storage stability of each batch is mentioned on the product label. A storage time beyond the mentioned date doesn't necessarily mean that the material is unusable. In this case a check of the qualities which are important for the respective

Our technical data sheets are to advise you according to our latest state of knowledge. This information does not release you from own tests of our products in view to the ability for the intended procedures and applications. The sale of our products is an accordance with our terms of business and delivery.

Smooth Filler BD7413MRU910

Processing and application	Application Both components have to be mixed homogenously.The processing time as well as the hardening time depend on the temperaure. They have to be established in situ using approx. 100 g.A hardener overdosing can lead to colour changes in the finish coating system.Substrates ferrous, grey cast iron, GFP, soft and hardwoodPretreatment The substrates must be free by adhesion-disturbing materials, e.g. oils, fats and tenside; grind with sandpaper or flex. Wood must be load-carrying and drying				
			Application temperature Processing temperature not lower than approx. 6 °C, in order to avoid hardening disturbances.		
			DryingAir-drying:above 10 °CDust dry:after 10 min. / 20 °CDry for handling:after 15 min. / 20 °CFurther-processably:after 40 min. / 20 °COverpaintable:after 30 min. / 20 °COven drying:tilltill10 min. / 40 °Cor6 min. / 60 °C possible		
			Cleaning of working equipment Within the working time with EFD-Cleaning agent 400312 or EFD-Cleaning agent 400906.		
			Advise for safety protection and protection of health The usual precautionery measures for ventilation as well as for personal protection are to be observed when handling painting materials. Detailled information about dangerous goods, sayfety data and recommendations concerning health protection and environment protection can be read in the corresponding safety data sheet.		
	Special remarks	Test conditions All information is based on a standard climate 20/65 DIN 50014.			
		All information are based on our product knowledge and experience. To the application we have no direct influence. For further information please don't hesitate to contact us.
